TTS MOBILE LINK CONVEYOR SYSTEM

The TTS mobile link conveyor system allows to create highly productive complex of transfer of bulk cargo without capital construction in the shortest terms with optimum investments.

RANGE OF USE:

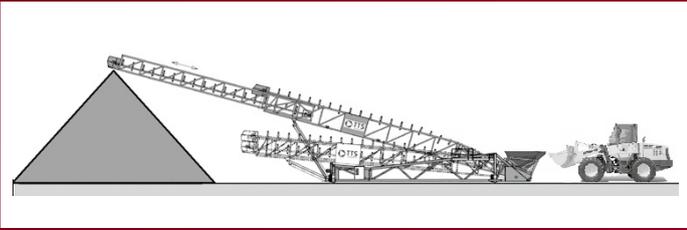

- › Ground storage and covered warehouse
- › Building sites
- › Pits
- › Sea and river ports
- › Transshipment facilities
- › Bulk cargo terminals
- › Agricultural complex

Configuration and modification of the equipment according to the individual requirements of the customer.

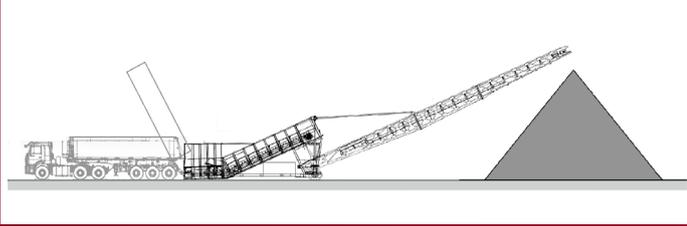

BASIC FEATURES (TTS-MC-600/25):

- › Capacity: 600 t/h
- › Boom length: 25 m
- › The height of bulk cargo feed 2-10 m, adjustable
- › Conveyor belt: 1000 mm, chevron
- › Generating capacity: 55 kW
- › Connection: 400 V, 50 Hz
- › Wheeled undercarriage (towed)
- › Extra options:
 - › Magnetic metal separator
 - › Receiving chute
 - › Vibrating motors for the chute
 - › Dust absorbing systems

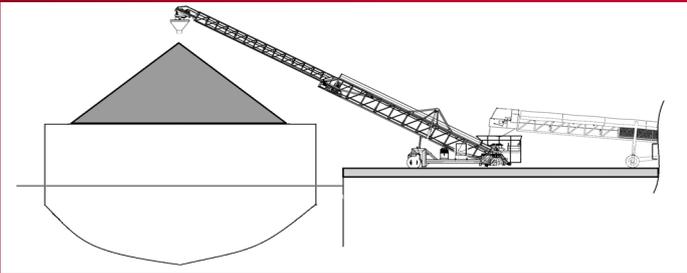

LAY-OUT OPTIONS

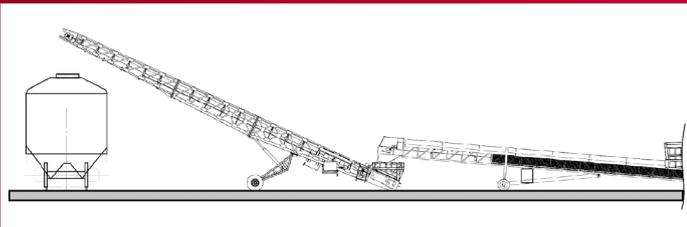

- The forming of the open longitudinal and radial stacks in a warehouse
- Bulk cargo feeding with the front end bucket loader

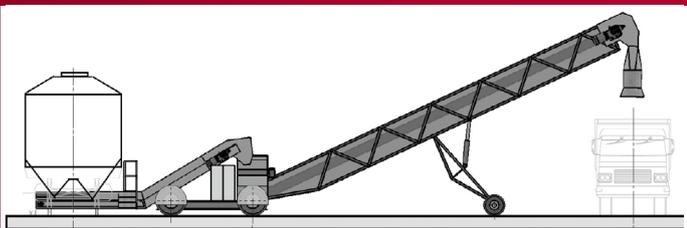

- Automotive transport's direct unloading
- The filling up of covered warehouse or ground storage

- The loading of marine (sea) and river transport
- The combination of several units in a line

- The loading of railway transport
- The loading of containers

- The unloading of railway transport

EXTRA TECHNICAL EQUIPMENT:

- › Belt conveyors
- › Scrapers and chain conveyors
- › Feeding chutes
- › Warehouse equipment (stackers, reclaimers, kratzer-cranes)

TTS (Transportation Technology Systems) – manufacture of transportation technology systems and non-standard equipment.

Wide experience in designing and production of not-standard equipment and bulk cargo handling complexes.
